### DESCRIPTION

The stabilized PSU **PSDC05125T** stabilized power supply is designed to supply analog cameras or other devices requiring stabilized voltage **12V DC**. The output voltage adjustment range is adjusted via a potentiometer within the range of **12V ÷ 15V DC**. The PSU features 5 outputs protected independently by glass fuses. A failure (a short circuit) in the output circuit makes a fuse blow or an activation of the polymer fuse and disconnection of the circuit from the DC power supply (+U). The PSU is housed in a metallic enclosure with an indication panel .
